

The Liceo Scientifico, founded in 1991, is committed expanding and promoting excellence in quality education in the Republic of San Marino.

It is a course which allows you to:

- achieve an effective method of study;
- develop and broaden cultural interests;
- prepare for scientific courses at University;
- choose from a wide range of academic studies.

In particular, you will be able to:

- develop an abstract knowledge of subjects;
- enhance a critical approach;
- understand differences and connections;
- stimulate personal and motivated reflection.

Liceo Scientifico teaches essential skills and abilities in order to:

- discover the physical and natural world;
- improve cultural understanding in history, the arts and general human knowledge;
- have a very high standard of subject knowledge;
- communicate this knowledge effectively.

### **Extra curricula activities offered**
